Role 3 – Pharmacologist

A Pharmacologist is a healthcare professional who specialises in the study of drugs and their effects on the body. They are responsible for researching, developing, testing, and evaluating new and existing drugs, as well as ensuring that drugs are safe and effective for human use. Their work involves analysing drugs, studying their effects on the body and determining which medicines should be used to treat particular conditions. Pharmacologists can be involved in the design and implementation of clinical trials, as well as the development of new medications and the evaluation of existing ones. They also educate healthcare providers and the public about the safe use of drugs and the importance of following instructions.

Pharmacologist Duties

- Designing, developing and testing medications and treatments.
- Developing protocols and conducting clinical trials.
- Advising on the safety and effectiveness of drugs.
- Monitoring the effects of drugs on patients.
- Researching the effects of different medications on the body.

Pharmacologist Skills

- Knowledge of pharmacology and pharmaceutical science.
- Ability to interpret and analyse scientific data.
- Ability to plan, design and carry out research.
- Ability to work effectively with colleagues and stakeholders.
- Excellent communication and interpersonal skills.

Pharmacologist Personal Traits

- Analytical.
- Methodical.
- Excellent communication skills.
- Attention to detail.

Main Duties and Responsibilities

- Design, plan and conduct controlled experiments and/or clinical trials to improve understanding of a drug's activity.
- Collect, analyse and interpret data.
- Make recommendations based on research outcomes.
- Create proposals for future developmental tests.
- Manage and oversee tests of new drugs and medicines and ensure quality control and secure approval for their use.
- Meet with regulatory bodies and authorities to ensure compliance with local, national and international regulations.
- Supervise technical staff and support early-career pharmacologists.

Qualifications

- Degree in pharmacology (biochemistry, physiology or microbiology also considered).
- 3 A levels, or equivalent, including biology and chemistry.
- 4 or 5 GCSEs at grades 9 to 4 (A* to C), or equivalent, including English, maths and science.
